Daniyal Ahmad

(416) 799-5201 | daniyal.ahhmad45@gmail.com | github.com/daniyalahmad45 | Portfolio

Education

Toronto Metropolitan University — Toronto, ON
BSc in Computer Science — *Sept. 2024 – Expected 2028*
- Dean's List (2024–2025), Dean's List (2025–2026), GPA: 3.5

Experience

Research Lead, Pawsknow (Riipen Labs Project) — Aug. 2026
Riipen — *Remote*
- Led market and competitor research for Pawsknow, a Vancouver startup building a color-changing diagnostic cat litter for feline health monitoring, benchmarking against Arm & Hammer, PrettyLitter, and Fresh Step/Dr. Elsey's
- Delivered Canadian pet industry data that informed a resource-efficient, omni-channel brand strategy

Sales & Business Development — July 2026 – Aug. 2026
Tahpin Inc., Venture for Canada Intrapreneurship Program — *Remote*
- Built a sales pipeline for Tahpin Inc. through prospect research to support go-to-market outreach
- Served as AI Intelligence Lead on a student team for VFC's Responsible AI Adoption Challenge, building a workflow tool in React, TypeScript, and Express
- Owned the AI pipeline end-to-end: prompt design, structured JSON output, and a deterministic weighted scoring system across six criteria, then benchmarked GPT, Claude, and Gemini to recommend Gemini for the MVP
- Integrated a live HubSpot CRM handoff gated behind human approval, keeping a persistent in-the-loop before outreach

Software Scope Development, Fraser Delivery (Riipen Level UP Project) — May 2026
Riipen — *Remote*
- Ran a needs assessment for Fraser Delivery, a Canada-India courier company, covering its shipment booking, tracking, and manifest processes
- Authored a software functionality outline and workflow diagram, then delivered a final scope of work with requirements, a data model, user stories, and acceptance criteria

Projects

Codebase Q&A Assistant (RAG) | *Python, ChromaDB, Sentence Transformers, Gemini API, Streamlit*
- Built a Retrieval-Augmented Generation system that lets developers ask natural-language questions about an unfamiliar Python repository and get answers grounded in the source code
- Used Python's AST module to parse repositories into structure-aware chunks, then embedded them with Sentence Transformers and indexed them in a persistent ChromaDB vector store
- Built a Streamlit chat interface with source inspection, and evaluated on 15 hand-written questions, reaching 14 correct, 1 partial, and zero hallucinations

AI-Based Face Recognition Attendance System | *Python, OpenCV, face_recognition, Arduino*
- Built a real-time facial recognition attendance system using OpenCV and the face_recognition library to identify individuals from a live camera feed
- Integrated an Arduino Uno R3 for physical feedback: green LED and servo-controlled gate on a recognized face, red LED and buzzer alert on an unrecognized face

Personal Portfolio Website | *React, JavaScript, Tailwind CSS*
- Designed and built a personal portfolio site with React and Tailwind CSS, deployed live on Vercel with a responsive, component-based layout

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, C, C++, Bash, HTML/CSS
Web, UI & Systems: React, Node.js, Express, REST API, Tailwind CSS, UX/UI Design Principles
AI, ML & Data: Retrieval-Augmented Generation (RAG), LLM APIs (Google Gemini), ChromaDB, Sentence Transformers, OpenCV, NumPy, Pandas, Matplotlib
Hardware & Embedded: Arduino Uno R3, Sensor/Actuator Integration (LEDs, Servo, Buzzer), Serial Communication
Tools & Platforms: Git/GitHub, HubSpot API, Linux, Render, VS Code, Vercel, Streamlit
